General specifications

- Max operating pressure for
steel body: 350 bar (5000 psi)
- Max operating pressure for
high pressure steel body: 500 bar (7250 psi)
- Max operating pressure for
aluminium body: 210 bar (3000 psi)

Note: aluminium bodies are often strong enough for operating pressures exceeding 210 bar (3000 psi), depending from the fatigue life expected in the specific application. If in doubt, consult our Service Network.
